The Kearney County Clever Clovers 4H group began fundraising efforts for their 2019 community project at Kearney County Health Services on March 13. The Clever Clovers are asking businesses and community members to donate in an effort to purchase an Automated External Defibrillator (AED) for the Kearney County Fairgrounds.

The group learned about the importance and life saving benefits of AEDs in February during American Heart Month. They were made aware of AEDs in public buildings like schools, churches, and government buildings and informed there is not currently one available at the local fairground building.
